Country: France

Project Name: Priority prevention plan

Project Reach: National; Sub-National

Project Time Period: 07/2017 - Ongoing

Project Impact areas: Health; Responsive Caregiving;

Project Funding: National Budget

Project Website:

Project Description:

Within the national public health strategy (2018-2022), a prevention plan (Plan priorité prevention) focuses directly on children from pregnancy to age six. This plan promotes the strengthening of government actions on prevention including social, educational and healthcare actions. One of the main objectives of the plan is to reduce children health inequalities.

To achieve this target, a multi-stakeholder approach is necessary in order to ensure the totality of all testing and exams are done at the right age, to make effective the medical visit before age six and to guarantee the proper care to physical, mental and emotional needs of children under six.

Legal Framework:
National public health strategy (2018-2022)
