Project Website:

Project Description:

New project aims to demonstrate the scale up of best practices and lessons learnt from the pediatric quality of care project. Implementation will take place as a collaborative effort of the ministries of health, national professionals, and WHO collaborating with organizations and institutions in the Russian Federation.

The key objectives of the project include:

1. to take hospital quality improvement on a large scale in low resource settings and impact maternal, neonatal and childhood mortality and morbidity;
2. to support capacity building of national health systems and establish a learning platform to ensure sustainability;
3. to strengthen the quality of TB and MDR-TB services.

Legal Framework:
Based on the Muskoka Initiative

Program Evaluation:

The monitoring process will be provided by the WHO.
